Instructional Usage

LED light status indicator

Yellow: HDMI is in use
Red: USB HOST is in use
Blue: SD/Micro SD is in use

*** All smartphone models used on this instructional guide are just a sample reference. Other functions vary depending on smartphone OS and MHL compatibility.**

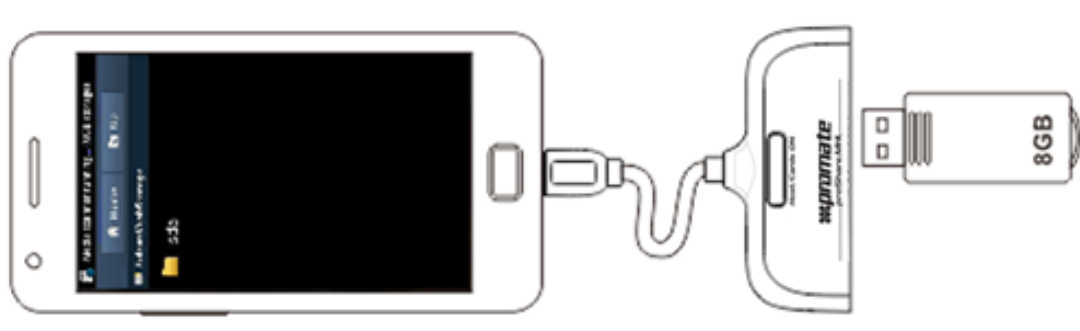

When using Galaxy S2, S3 and Note 2 with USB host, connect directly with the Micro USB 5-pin connection.

When using Galaxy S3 and Note 2 with MHL, the S3 Micro-USB MHL adapter should be connected. For Galaxy S2 and Note, the Micro USB 5-pin should be used.

Using USB connectivity

Connect the proShare.MHL Micro USB connector to Samsung mobile Micro USB female port, then connect the USB drive to the USB slot and press indicator button for about one second to start reading, at this time proShare.MHL indicator light is lit up with red. On Galaxy mobile, you can select **My Files** then to **USB Storage** (for S2 and Note) or **USBDriveA** (for S3 and Note 2) to view all the files saved inside.

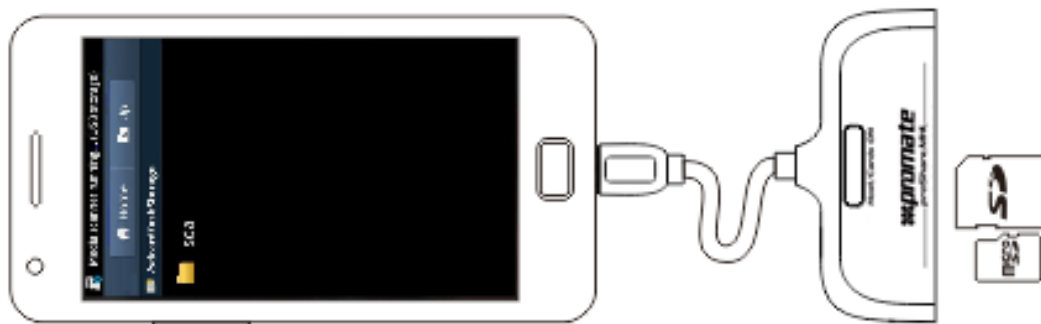

Note: When using USB Host, don't insert SD or Micro_SD card.

Using SD or Micro SD card

Connect the proShare.MHL Micro USB connector to Samsung mobile Micro USB female port, then connect the SD card or Micro SD card to the card slot and press indicator button for about one second to start reading, at this time proShare.MHL indicator light is lit up with blue. On Galaxy mobile, you can select **My Files** then to **USB Storage** (for S2 and Note) or **USBDriveA** (for S3 and Note 2) to view all the files saved inside.

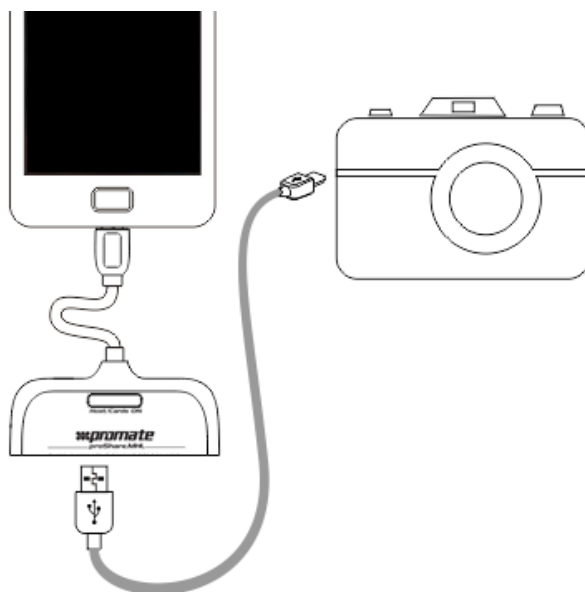

Note: When using Memory card, don't insert USB drive.

Connecting a digital camera

Connect the proShare.MHL Micro USB connector to Samsung mobile Micro USB female port, then connect the USB cable from the camera and press indicator button for about one second to start reading, at this time proShare.MHL indicator light is lit up with red. On Galaxy mobile, you can select **My Files** then to **USB Storage** (for S2 and Note) or **USBDriveA** (for S3 and Note 2) to view all the files saved inside.

Note: When using Digital Camera, don't insert SD or Micro SD card.

Using the MHL function

First, connect the proShare.MHL to the mobile. Then connect the HDMI to the proShare.MHL and to the HDTV. Connect the Micro-USB cable to the proShare.MHL and the other end to any standard USB power source. At this point, the indicator light will lit up with yellow. The HDTV will show the same screen of mobile synchronously after 10 seconds you can play videos or work on files from your mobile through a larger HD display.

***Note:** When connecting with the Galaxy S3 or Note 2, the Micro-USB 11-pin adapter should be connected.*
